Declaration of Conformity – DoC

We, RECOM Power GmbH, Münzfeld 35, 4810 Gmunden, Austria, declare in our capacity as manufacturer the following concerning

Shelf Life: All our DC/DC converters have a 10-year shelf life under the following conditions:

Storage conditions: controlled indoor environment with normal room temperature (25°C) and normal humidity (<60%RH). The temperature and humidity should be stable.

Appearance: It is possible that some surface discolouration on the packing tubes, case or pins can occur, but this will not affect solderability or the converter function. Any hairline cracks in the case do not affect converter function.

Contaminants: The converters are not affected by dust or dirt but they should be cleaned before use. Any water-based or solvent-based wash suitable for electronic components can be used.

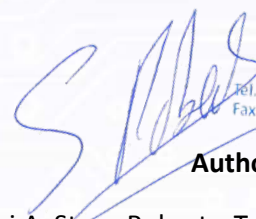

Warranty: The RECOM warranty period begins from the date of purchase, so any converters stored for longer than this period will be out of warranty. RECOM reserves the right to accept or reject any subsequent converter failures or customer complaints on a case-by-case basis.
